

# Ability Equipped

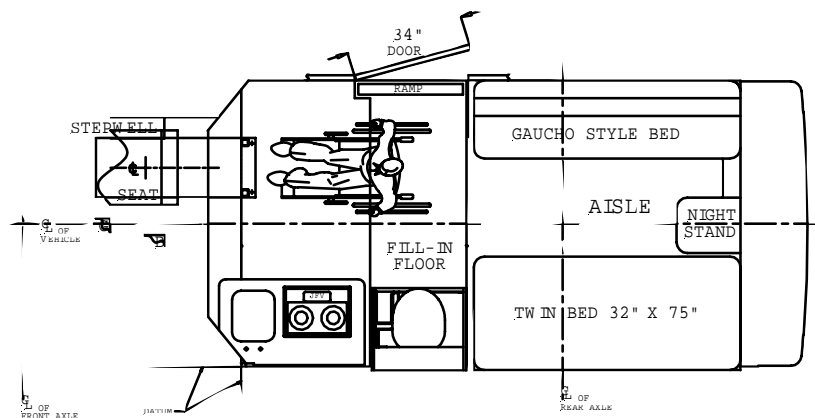

## Now you and your loved ones can enjoy the comfort and convenience of travel and adventure in an Ability Equipped Rialta® from Winnebago Industries®.

Starting with a standard Rialta, the conversion specialists at Winnebago Industries Commercial and Specialty Vehicles Division have created a highly maneuverable, fully functional wheelchair accessible motor home to meet the travel needs of wheelchair mobile individuals.

The Ability Equipped Rialta is a Class C motor home that is compact enough to go practically anywhere you want to go. It fea-

tures front wheel drive, has a turning radius that is tighter than a standard full-size van, and is powered by a proven Volkswagen® powertrain.

Featuring a rear sitting area that converts to sleeping accommodations, bathroom facilities, and a well-furnished galley. An Ability Equipped Rialta offers travel freedom and comfort that you may not have realized was available.

---

The Ability Equipped Rialta features a wide entrance door for wheelchair access. The convenient ramp folds up when not in use.

---

---

The ramp, in its extended position, offers a low angle for easy entrance.

---

---

The ramp opens to allow passenger access through the entrance door.

---
