

Technical Bulletin

Subject: **Speedometer Replacement, Compliance with Governmental Regulations**

Group: **90**

Number: **96-02**

Model(s): **All**

Canada Only

m.y. All

Date: **May 29, 1996**

When replacing a speedometer, Federal and/or Provincial regulations require that the odometer of the replacement unit be set to the actual mileage of the vehicle or at zero kilometers. **(see further explanation below).**

Federal / Provincial regulations:

Federal / Provincial regulations allow the replacement speedometer (odometer) to be set to the true vehicle mileage or to zero kilometers. If set to zero kilometers, Federal / Provincial regulations requires that a label be affixed to the left B-pillar (near the Safety Certification Label) of the vehicle specifying:

- Vehicle mileage before the speedometer (odometer) replacement.
- Date of the speedometer (odometer) replacement.
- Dealer or service repair shop which replaced or repaired the speedometer (odometer) unit.

Note:

Canadian Federal regulations prohibit tampering with odometer mileage in any way.

Service

A speedometer (odometer) replacement label is included with replacement speedometers.

1. –Fill out the label completely and affix to the left B-pillar (near the Safety Certification Label).
2. –Fill out the speedometer replacement section of the vehicle Maintenance book completely (including Dealer Stamp) for warranty record purposes.

If a label is not included with the replacement speedometer, order labels through your Parts Depot using Part No:W55SPEEDOCDN.
