How To Use This Guide

From the Table of Contents, identify the vehicle model and scroll to the appropriate page. Each illustration will call out DuPont paint codes for the main body color and any accent colors in the graphics and/or valance panels. You can select the proper code by the accompanying color description.

Valance panel colors may also be labeled with a 3-digit exterior paint option number (Examples: 27G, 92K). If unsure of a valance color because the color descriptions are similar, you can confirm the correct exterior paint option number from the vehicle's equipment list. If this list is not available to you in the coach, you can access the correct information by serial number in the WinNet Warranty Menu under Vehicle Information/ Vehicle Options.

2001 EUROVAN CAMPER

2001 *Rialta*

Main Body Color

VW White – W9670
